gathr

Continuous Compliance in CI/CD

Company Profile

A leading US-based fintech company with a development center in India

Headcou

Presence 47 Countries

Key Challenges

With numerous ongoing projects, the company was facing difficulties in monitoring process compliance:

- Lack of centralized visibility to assess compliance across enterprise projects.
- Manual tracking of every commit, pull request (PR), and peer approval was untenable.
- It wasn't easy to track if developers used the pre-defined tools and procedures for version control, source code management, peer reviews, etc.

The Solution

Gathr implemented its solution for Continuous Compliance, providing a flexible approach to monitoring changes across a delivery pipeline, automating compliance, introducing release gates, and ensuring secure and reliable releases. It involved the collection and visualization of data from tools like Jira, GitLab, and Amazon CodeDeploy:

Continuos Compliance No Sergistes Help						🔕 🛞 Execute Only	5 / 8 0
g	Continuos Compliance	APPLICATIONS Select Here					Citar V
03 A	pplications	APPLICATION SCORE CARD					8 1 4* 1
		Billing Management	68	Claims Processing		Hember Haintenance	
		entry rongentin	00	claim Processing	60	Hember Homesonce	12
STATUS	21	Production Changes done vis a Pipeline	× 8 of 9 (88.9%)	Production Changes done via a Pipeline	X 4 of 5 (85.0%)	Production Changes done via a Pipeline	5 of 5 (100.0%)
STATUS Possed (1)	21		_		_		
	21	Production Changes done vio a Pipeline	× 8 of 9 (88.9%)	Production Changes done via a Pipeline	× 4 of 5 (80.0%)	Production Changes done via a Pipeline	✓ 5 of 5 (100.0%)

- Continuous compliance report for a quick overview of compliance across projects
- Visual tracking of the percentage of changes following the pipeline tools, PR approvals, and peer reviews
- Contextual details for release management and root

- cause analysis
- Easy configuration to adjust application pass/fail criteria with different metric thresholds
- What-if analysis for testing different scenarios

The Impact

After a proof of concept, the company quickly onboarded the solution. It found the solution highly effective in assessing the completeness of changes and pipeline compliance. Instead of wasting hours, the teams could trace every change to its author, reviewer, and approver in minutes to identify compliance gaps and training needs.

"We have seen an increase in pipeline compliance by 3X within a month of implementing Gathr solution. With better CI/CD compliance, we expect continuous improvements in quality in the future."

GO GATHR

Data to outcomes, 10x faster.

- No-code/ low-code for data at scale, at rest or in motion
- Built-in ML to augment, automate and accelerate every step
- 🕗 Drag and drop UI, 300+ connectors, 100+ pre-built apps
- Collaborative workspaces for Data, ML, Ops & Business users

Data Integration

Open, extensible, cloud-native and interoperable
